# BIONEX®

BioneX® has developed the next generation of software that operates and seamlessly integrates with your MedX® medical machines.

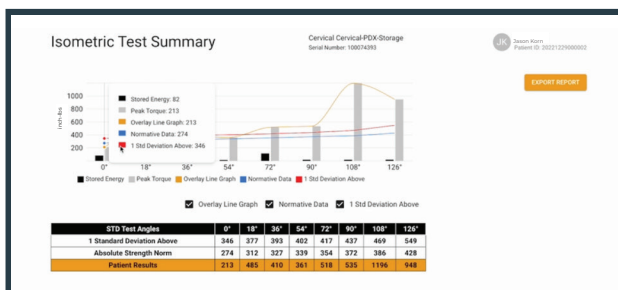

As we strive to provide exceptional care to your patients, the tools we employ become extensions of your expertise and compassion. In this ever-evolving landscape of healthcare technology, we are thrilled to introduce you to the future—BioneX® Software. Our aim is to elevate your practice, streamline your operations, and improve patient outcomes!

Launched in 2023, BioneX® sets a new standard for interfacing with MedX® medical devices. This cutting-edge software powers all MedX® medical machines (Lumbar Extension, Cervical Extension, Knee, Cervical Rotation, and Torso Rotation).

Clinician-Centric Design

BioneX® offers an intuitive user experience with a focus on seamless navigation and effortless interaction. The interface is thoughtfully designed to simplify tasks, enabling you to focus on what matters most—patient care.

Secured Online Data Management

Your patients' data deserves the utmost security. Our cloud-based storage solution offers efficiency and robust security measures that meet industry standards for the collection of sensitive health information.

Wireless Connectivity

Wireless connectivity means clinicians can better attend to their patients using any laptop, tablet, or device that can connect to a LAN. Unchain yourself from a wired computer and move freely around your MedX® equipment.

Data Analysis Made Easy

Transform raw data into clear actionable insights. With BioneX®, compare patient data against normative sets and other relevant data seamlessly, driving more informed clinical decisions.

Efficient Patient Management

Whether you manage one location or multiple, BioneX® centralizes your operations. Share patient data across locations or accounts effortlessly, ensuring consistent and high-quality care delivery.

Why Trust BioneX®?

Randy Ziobro, the driving force behind BioneX®, brings over two decades of experience in Occupational and Sports Medicine Rehabilitation. His deep involvement with MedX equipment since 1994 and collaborations with renowned MedX® medical professionals have shaped the software's development.

Support & Services

The BioneX® experience doesn't stop at software. Our team is on standby for technical support and remote troubleshooting. In addition, our services also include machine maintenance, calibration, installation, and relocation.

We Offer Education (CEU's)

We are excited to offer multiple education courses. Our 3-day course on the Lumbar Extension and Cervical Extension machines offers clinicians 22 CEUs, enriching their professional journey.

For clinic owners and healthcare professionals looking to optimize their MedX® equipment's capabilities, BioneX® represents a comprehensive, user-friendly, and secure solution. Its rich feature set, coupled with extensive support and training opportunities, ensures that clinics can offer enhanced patient care.
